

Lab - 3

Introduction to jQuery

Course: AICT / Web Basics

Semester: 1st Semester

Duration: 1 Hour

Learning Objectives

- Understand what jQuery is
- Link jQuery using CDN
- Select HTML elements using jQuery selectors
- Handle button click events
- Show/Hide elements
- Change CSS using jQuery
- Use basic effects (fade, slide)

Part 1 – What is jQuery?

jQuery is a fast and lightweight JavaScript library that makes:

- HTML manipulation easier
- Event handling simpler
- Animations smoother

Part 2 – Linking jQuery (CDN Method)

Add this inside <head> section:

```
<script src="https://code.jquery.com/jquery-3.7.1.min.js"></script>
```

Part 3 – First jQuery Program

Practical 1: Button Click Alert

```
<!DOCTYPE html>
<html>
<head>
  <title>jQuery Lab</title>
```

```
<script src="https://code.jquery.com/jquery-3.7.1.min.js"></script>
</head>
<body>

<h2>Welcome to jQuery Lab</h2>
<button id="btnClick">Click Me</button>

<script>
$(document).ready(function(){
    $("#btnClick").click(function(){
        alert("Button Clicked!");
    });
});
</script>

</body>
</html>
```

Part 4 – Show & Hide

Practical 2: Hide and Show Text

```
<p id="text">This is a paragraph.</p>

<button id="hideBtn">Hide</button>
<button id="showBtn">Show</button>

<script>
$(document).ready(function(){

    $("#hideBtn").click(function(){
        $("#text").hide();
    });

    $("#showBtn").click(function(){
        $("#text").show();
    });

});
</script>
```

Additional Effects:

```
$("#text").fadeOut();
$("#text").fadeIn();
$("#text").slideUp();
$("#text").slideDown();
```

Part 5 – Changing CSS

Practical 3: Change Background Color

```
<button id="colorBtn">Change Color</button>
```

```
<script>
$(document).ready(function(){

    $("#colorBtn").click(function(){
        $("body").css("background-color", "lightblue");
    });

});
</script>
```

Change Multiple CSS:

```
$("#h2").css({
    "color": "red",
    "font-size": "30px"
});
```

Practice Task

Create a page that:

- Changes text color when button is clicked
- Hides paragraph
- Shows it again
- Adds fade effect

Viva Questions

1. What is jQuery?

2. Difference between JavaScript and jQuery?

3. What does \$ mean in jQuery?

4. What is \$(document).ready()?

5. What is a selector?

Homework

Use .animate() method:

```
$("#box").animate({  
  left: '250px',  
  opacity: '0.5'  
});
```

Class Task - 3

Create a simple student profile page:

- Student Name
- Department
- Button → “Highlight”
- When clicked:
 - Background changes
 - Text becomes bold
 - Paragraph fades out
